FEATURING

Turmeric

Turmeric has been valued for centuries in traditional Chinese and Ayurvedic medicines. In recent times, Turmeric's active constituents, curcuminoids, have undergone extensive research. These powerful compounds support healthy inflammatory response and immune system function, provide antioxidant activity, and protect against the genetic effects of lipid peroxidation. Botanical Treasures® features Curcumin C3 Complex®, a potent extract of Turmeric standardized to 95% curcuminoids.*

Green Tea

Green Tea extract, which has synergistic effects with Turmeric, is highly prized for its well-researched catechins, including epigallocatechin-3-gallate (EGCG) that exhibit significant effects on immune system response and antioxidant activity. This herbal extract maintains and supports healthy cells and provides protection against environmental stressors.*

Black Cumin

For thousands of years, *Nigella sativa*, or 'black cumin' has been cultivated and used around the world for its extensive health benefits. Modern research has validated its potential for modulating healthy immune and inflammatory responses, supporting bronchial health, and optimizing blood glucose and lipid metabolism. Rich in bioactive compound thymoquinone, black cumin has wide applications for cellular health and encouraging healthy detoxification activity.*

Trans-Resveratrol from Japanese Knotweed

Trans-resveratrol from *Polygonum cuspidatum*, or 'Japanese Knotweed' is a stilbenoid that plays a crucial role in promoting cellular health and genetic integrity by providing antioxidant activity and quenching free radicals. Its broad-spectrum therapeutic benefits include helping to maintain cardiovascular health by maintaining a healthy blood lipid profile, modulating adaptive immunity and healthy inflammation, and supporting neurological health for healthy aging and longevity.*

Holy Basil and Rosemary

Holy Basil works together with Rosemary to promote a wide spectrum of natural antioxidant activity in the body and reduce free radical damage that occurs with aging. Holy Basil encourages a healthy inflammatory response function and optimizes adrenal gland activity. Rosemary has been used for centuries as a tonic and mild stimulant to support digestion and to promote nervous system health.*
